Interdisciplinary Research Requires Interdisciplinary Teaching

Mechanics & Numerics & Machine Learning & Uncertainty Quantification

Specialist competences

Interdisciplinary teaching must explain linkages:
What do these disciplines have in common?

4 MAY 2023 · PAID

While our models still hold a slight edge in terms of quality, the **gap is closing astonishingly quickly**. Open-source models are faster, more customizable, more private, and pound-for-pound more capable. They are **doing things with \$100 and 13B params** that we struggle with at \$10M and 540B. And they are doing so in weeks, not months. This has profound implications for us:

**We are quit
successful at the
moment**

**... but will we be in
future?**

Open Sourced Intelligence & Research Software Engineering

Findable **A**ccessible **I**nteroperable **R**eusable

Starting Point: Mechanical and Civil Engineering Curricula

Bachelor

- Statics
- Mechanics of materials
- Dynamics

Master

- Continuum, Solid & Fluid Mechanics
- Finite Elements (Numerics)

Machine Learning

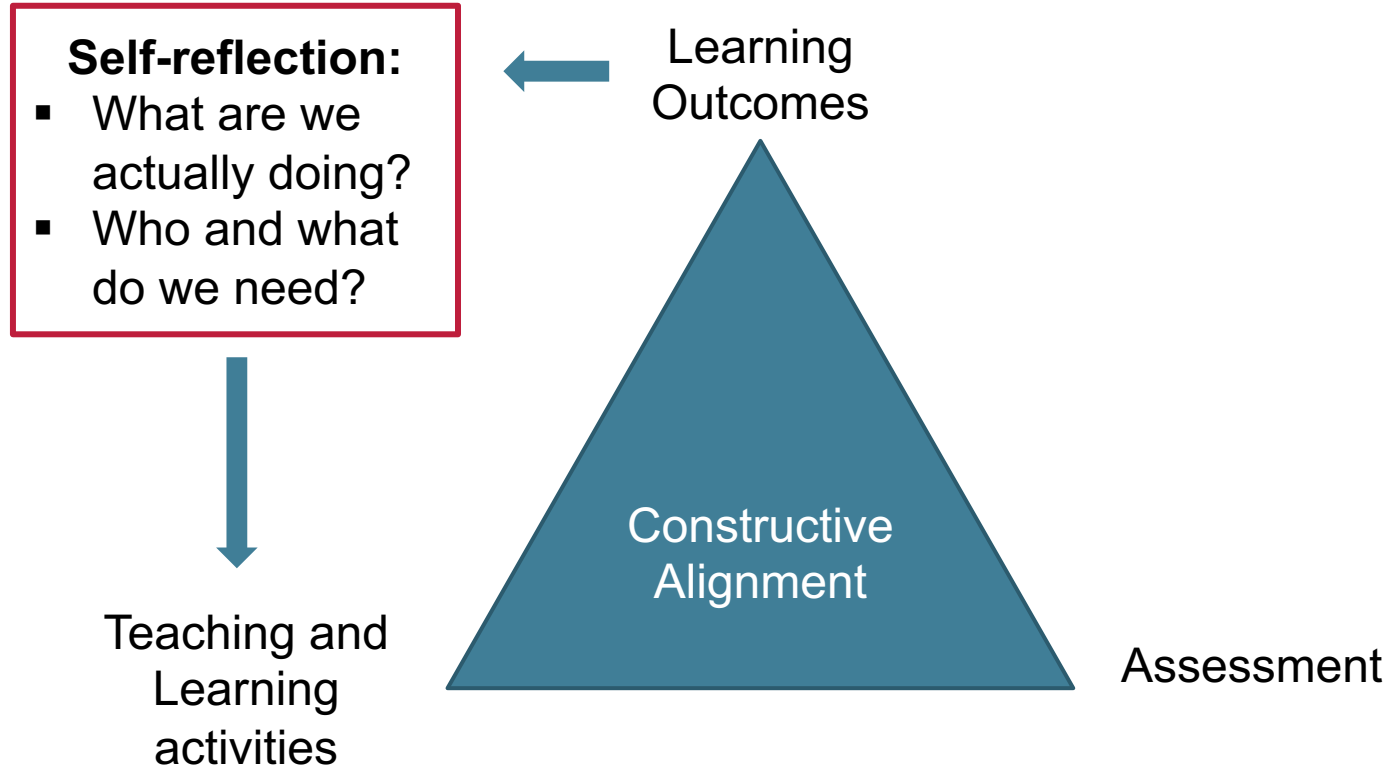

Neural networks
Optimization

Bayesian ML
Classification
Reduced Order Modeling

“A bouquet of methods that have been developed during the past decades”

Constructive Alignment

Constructive Alignment Computational Engineering

Mechanics**

Research-Led Learning: Master Course Data-Driven Material Modeling

You might have already heard about it – anyways, here you get a condensed overview

Introduction to

- Continuum Mechanics
- Finite Elements
- Machine Learning

Interdisciplinary linkage

- Constitutive modeling with neural networks
- Physics-informed neural networks

Basically learned all you need before – now it's all about innovative combinations!

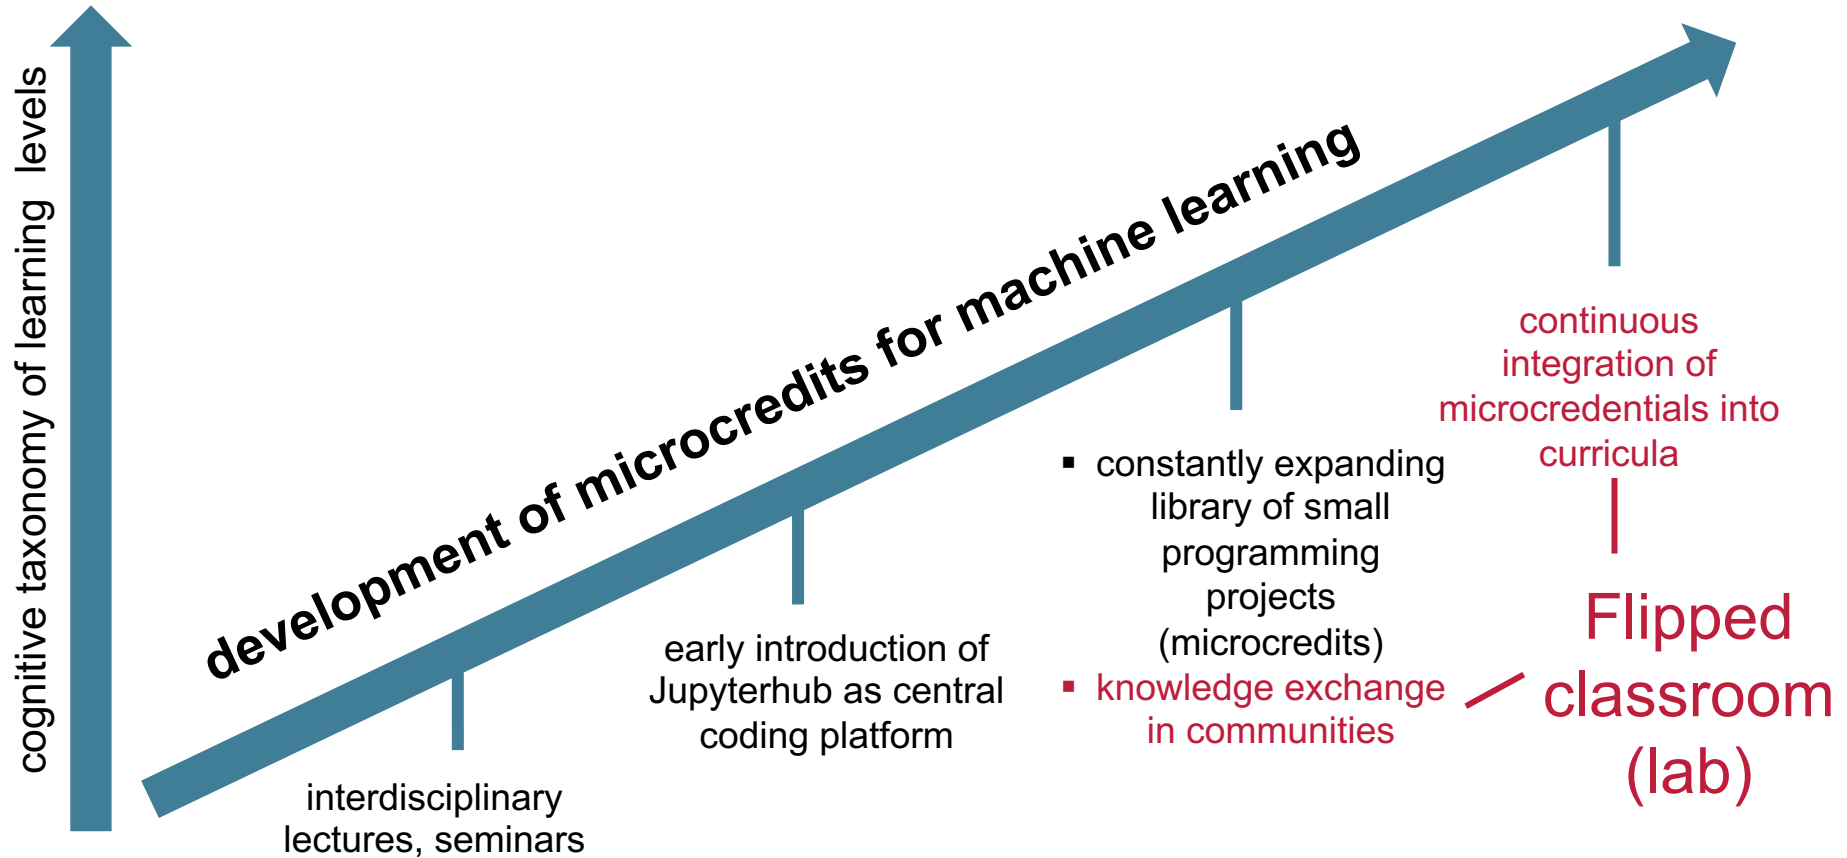

- 0.25 – 1 ECTS
- Coding on Jupyterhub
- Exchange of materials
- Learning in communities (lab)

Summary

Machine Learning & Didactics

designed by freepik.com

“A bouquet of methods that have been developed during the past decades.”

1. **Learning from didactics** of mathematics: Roadmap “Teaching in Computational Engineering”?
2. **The conflict between teaching for industry or science fades in interdisciplinary research & teaching**
